The results of the study show that children who watch horror films experience

anxiety, fear, difficulty sleeping, negative thoughts, the desire to be alone, and imagining scary things to commit acts

of violence, even against themselves and their parents.

The Effect of Watching Horror Film on Health Children and Adolescents in ...

While there is no absolute age at which scary movies are appropriate, Dr.

Dry recommends not introducing them to very young children because of the potential to

create long-term anxiety.
