What happens if a solar flare hits Earth? When solar

flares do hit Earth, they can wreak havoc to electronics and communication

systems. NOAA warns that GPS systems and radio signals can

be disturbed by a solar storm.

What is the danger of a solar storm in space? Very high-energy

particles, such as those carried by CMEs, can cause radiation poisoning

to humans and other mammals. They would be dangerous to unshielded

astronauts, say, astronauts traveling to the moon. Large doses could be

fatal.
