Anxiety changes brain chemistry, and makes it easier for the mind to focus on the negative.

You're not only more likely to have a scary thought when you have anxiety, you're also more likely to focus on the thought, have the thought cause more anxiety, and ultimately have more scary thoughts in the future.

O O bet365

We have a brain that processes information very deeply and feels emotions very vividly, compared to other people.

This trait is linked with many good qualities - empathy, creativity, and giftedness among them - but it also means we experience unsettling scenes very differently than other people.
