ting course Around the Sun after they were formed. The re-gravity of the Moon

is keeping an orbit;

the Moon stays on its orbit because of the

force of the Earth's gravity;

the Earth's gravity is enough to keep a satellite on orbit;

the Earth's gravity is enough to keep a satellite on orbit;

for hundreds of years. A satellite maintains its orbit by balancing two

of factors:

the Earth's gravity and the satellite's velocity.

the Earth's gravity and the satellite's velocity.
