<p></p><p>So, I got a soft blob-like thing, and I was tossing
with it in a prototype for a very long / , time. It turned out that it s tough t
o invent something new. Finally, I got an idea of a fat cat / , that likes to bl
ow balloons. The name of the game is Puffy Cat, and I ll be glad if you play / ,
it on Poki!</p>
<p>The final version of the game has 150 levels, 26 hats, 18 balloon skins
, 225 sprites, 35 sound / , fx, and plenty of fun! And we agreed with the publis
her to make two more games in the Puffy Cat / , series with new game mechanics a
nd content.</p>
<p>What I like the most about Defold is that:</p>
<p>I use Defold IDE to make / , levels, i.e. I have quite a few pre-made g
ame objects to construct a level. Every level is a collection with / , reference
s to these game objects. All these levels linked to the parent collection as Def
old s collection factories. It s an easy / , way to make levels without any exte
rnal editors like Tiled etc.</p>
<p>All I need to run a game from sources is / , to download Defold IDE and
build/run a project.</p>
