The linear range can be measured simply by making a

plot of analyte concentration versus fluorescence, using evenly-spaced analyte

concentrations, and seeing at what concentration the data deviate from a straight

line that is tangent to the low end of the concentration range.

How to calculate linear range

and LOD from fluorescence sensitivity ...

researchgate : post : How_to_calculate_linear_range_and

LOD_...

Deter

mining the linear range is relatively easy, and can be achieved by taking

a sample and performing a serial dilution.

If the ranges overlap then determining the amount of sample to load is also similarly easy.

Linear range of detection

and what it means for your quantifications
