<p&gt;&lt;/p&gt;&lt;p&gt;To fully exploit the constrained width, avoid loadin g the neighbouring structures and straddle shared utilities running under the si te, the &#129522; house was constructed using a lightweight steel frame on a pi led slab. The steelwork was prefabricated as a series of &#129522; portal frame s that were craned down the alley and site-welded together. Given that every inc h in such a narrow space &#129522; was valuable we chose to fully weld the conn ections and express the frame internally, even utilising the depth of the &#129522; steels to maximise the space.&lt;/p&gt;
