INS in pre-contact times, when ancient Hawaiians feasted on freshly caught ma'ui. The site was discovered in 1971 by a team of archaeologists from the University of Hawaii. The site is located in the coastal region of the island of Hawaii, near the town of Hilo. The site is a pre-contact site, meaning it was occupied before the arrival of European missionaries in the 18th century. The site is a significant archaeological site, as it provides insight into the lives of the ancient Hawaiians. The site is a pre-contact site, meaning it was occupied before the arrival of European missionaries in the 18th century.
