O algoritmo do jogo Crash funciona da seguinte forma: o jogo gera um gráfico com um valor crescente, que pode ser encerrado em qualquer momento pelo jogador. Ao encerrar o jogo, o jogador ganha uma quantia proporcional ao valor atingido no gráfico. No entanto, existem também riscos envolvidos, uma vez que o gráfico pode "estourar", fazendo com que o jogador perca tudo, caso o jogador não tenha encerrado o jogo a tempo.

O objetivo do jogo é, portanto, balancear o risco e a recompensa, sabendo quando encerrar o jogo para maximizar as ganhas. O algoritmo responsável por gerar o gráfico é, portanto, um dos elementos-chave do jogo, uma vez que ele define a taxa de crescimento, os riscos e a aleatoriedade envolvidos no jogo.

É importante notar que o algoritmo do jogo Crash pode variar de acordo com a implementação, o que pode influenciar na dificuldade e na experiência de jogo. Além disso, existem diferentes versões do jogo, como o Crash Online, que adicionam mais elementos de competição e estratégia ao jogo.

There are various deposits around the valley that you can mine. Some will clearly show gemstones buried inside, so you can mine these and collect the precious jewels that drop. Many of these sell for over 600 Star Coins, so you can quickly repeat this process once the deposits respawn.
