You can play Vortelli's Pizza on Poki!

The Making Of

I've always liked the idea of creating experiences for the web. Nowadays,

almost every mobile and desktop device has a web browser and visitors

can experience your creation without the friction of downloading

and installing a separate app. Prior to creating Vortelli's, I dabbled with

tools like Three.js, Phaser and Construct, but I never actually completed

a project. I kept falling into the cycle of starting a project with excitement

and motivation but as I'd encounter problems, I'd gradually lose interest

and eventually quit.

In mid-2024, I promised myself that I was going to break that

cycle by finishing and releasing a 3D multiplayer web game. I still wasn't

proficient with any particular game engine and I spent many hours reading

and watching YouTube videos trying to decide on the perfect engine. I

eventually figured out that there was no such thing as a perfect engine and I

really just needed to pick one, learn the basics, and start building.
