<p></p><p>The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at 🌜 th
e price it s well worth it.</p>
<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon
stone, the Poki comes 🌜 with a cloth carrying case that you can stash a
USB cable in (it appears to come with a 6 ‡ 🌜 USB-> MicroUSB,) or ch
uck your ID and credit card in and use it as a wallet while you re out. It s
27772; actually the first thing that stood out when I was looking at the device
. The Moonstone is still going strong 🌜 with a friend of mine a year la
ter.</p>
<p>The battery delivers a 90% conversion efficiency rating according to sp
ecs on the 🌜 manufacturer s website. Most batteries go from the high 70
s to mid 80 s. You want to see a higher number as 🌜 this is how much p
ower gets delivered with the rest being lost in conversion.</p>
<p>The Poki can charge and recharge at 🌜 2.1amps. This means you
re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you
should 🌜 be able to charge this in under five hours and with 90% conve
rsion efficiency you should have around 9000mAh of 🌜 actual juice to sp
are. That should be enough for at least three complete charges from dead to full
