

# jogo aposta roleta

The odds against winning is a ratio of 3:1, meaning the odds against winning are 3 to 1. Thus, the probability of winning is 0.25, or 25%.

If the odds of winning are 3:1 against, what is the probability of winning?

3 & amp; 1: This means that one player had a two-shot lead going into the 17th hole, and won that hole so they won by three and there was just a single hole to play. They played 17 because had their opponent won the last two holes, the match could have ended in a draw.
