upward. Before the plane goes down, press the cash out button. Depending on where you are, some may be required to wear a mask, and some may require a health certificate. Cervical spondylosis is a common condition that causes neck pain and stiffness. It is caused by the degeneration of the intervertebral discs in the neck. The discs act as shock absorbers between the vertebrae. As they age, they can become thinner and lose their ability to absorb shock. This can lead to pain and stiffness in the neck. There are several ways to manage cervical spondylosis, including physical therapy, pain medications, and surgery. It is important to see a doctor if you are experiencing neck pain or stiffness, as this could be a sign of a more serious condition.
