We found in the literature several reports of severe and persistent psychological reactions to films affecting moviegoers, but

in only two cases a positive diagnosis of PTSD was made.

</div></div></div></div></div></div></div></div>

It is no secret that watching horror films can have an impact

on one's mental health. They can arouse feelings of discomfort

and even trigger post-traumatic stress disorder (PTSD), which alters

the brain's chemistry (Sultana, 2024, p. 2).
