From Flash to HTML5 available without Poki games
Since people have always enjoyed unwinding and having fun, t
hey have created numerous devices or simply exploited resources that were availa
ble to them. That is how things familiar to us were created: balls, s
kittles before that they were just stones and sticks. But now we have
all these technology and devises, thanks to which the gaming component of eve
ryday life has increased many times.
Since modern browsers have stopped supporting Flash technolo
gy since 2024, games based on this system are gradually leaving web pages. Howev
er, there are still some of the most popular toys that work in browse
rs using special emulators. HTML5 technology significantly expands the possibili
ties for players. Created using modern developments, HTML5 games can
be launched both on desktops and on many other devices of various mod
