With a cross-platform app, some or even all of the source code can be shared across platforms, such as Android and iOS. As a result, developers need to code mobile assets only once. These assets will work seamlessly on all platforms so they don't have to be recoded for each individual platform.</div></div></div></div></div></div></div></div>

For Windows computers, you can use a USB cable to connect to the phone. and Tethering and then tap USB tethering. Note: Tethering your computer to your smartphone can drain the phone's battery, so make sure both devices are plugged into a power outlet while tethering, and turn off the connections once you're done.</div></div></div></div></div></div>
