<p>So, I got a soft blob-like thing, and I was tossing with it in a protot
ype for a very long 4 , £ time. It turned out that it s tough to invent something
new. Finally, I got an idea of a fat cat 4 , £ that likes to blow balloons. The
name of the game is Puffy Cat, and I ll be glad if you play 4 , £ it on Poki!<

/p>

The final version of the game has 150 levels, 26 hats, 18 balloon skins, 225 sprites, 35 sound effects, and plenty of fun! And we agreed with the publisher to make two more games in the Puffy Cat 4 series with new game mechanics and content.

<p>What I like the most about Defold is that:</p>

<p>I use Defold IDE to make 4 , 5 levels, i.e. I have quite a few pre-made game objects to construct a level. Every level is a collection with 4 , 5 references to these game objects. All these levels linked to the parent collection as Defold's collection factories. It's an easy 4 , 5 way to make levels without any external editors like Tiled etc.</p>

<p>All I need to run a game from sources is 4 , £ to download Defold IDE and build/run a project.</p>
