However, if you want to see a list of dependent variables, the following table shows the results of the regression analysis. The dependent variable is the number of games played, and the independent variables are the age, gender, and income of the player. The results show that the age of the player has a positive effect on the number of games played, while gender and income have no significant effect.

browser-based alpha version of the game, a great bit of nostalgia for the original Minecrafters out there.
