The TL;DR version of this review is: surprising light,

extremely pocketable, does the job, not my dream charger but at ; th

and price it is well worth it.

We ve covered a product of Lepow s before, the Moonstone. Like the Moon

stone, the Poki comes ; with a cloth carrying case that you can stash a

USB cable in (it appears to come with a 6 ; USB-; MicroUSB,) or ch

uck your ID and credit card in and use it as a wallet while you re out. It s #1

; actually the first thing that stood out when I was looking at the device

. The Moonstone is still going strong ; with a friend of mine a year la

ter.

The battery delivers a 90% conversion efficiency rating according to sp

ecs on the ; manufacturer s website. Most batteries go from the high 70

s to mid 80 s. You want to see a higher number as ; this is how much p

ower gets delivered with the rest being lost in conversion.

The Poki can charge and recharge at ; 2.1amps. This means you

re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you

should ; be able to charge this in under five hours and with 90% conve

rsion efficiency you should have around 9000mAh of ; actual juice to sp

are. That should be enough for at least three complete charges from dead to full

for any ; smartphone on the market today.

2.1 amp charging also means you re not going to spend ~7 hours charging

a 3000mA phone ; from dead, more like an hour and a half if your phone

supports it.charging that fast.
