to iOS to be hosted in its App Store. This change was due to the fact that many apps were packaged into containers, as they essentially repackaged their websites into apps, which was easier for developers to maintain. Requirements so people are able to download and play them on their iOS-based devices such as iPhones and iPads. The app developers and

Why can't I install APK files directly on my iPhone? Android and iOS are two major mobile operating systems. APK files are technically meant for mobile devices using Android. In contrast, iOS devices like iPhones or iPads have a separate file format called IPA (iOS App Store)
